

**Open** 2020-21

# A School Where Every Child Excels

# Nursery, LKG, UKG & 1<sup>st</sup> to 6<sup>th</sup> Standard

#### **Committed Teachers**

We monitor each child's development in realtime. The teacher recognizes and interprets each child's needs and interests based on their stages of development and personality traits.

## **Every Child Is Different!**

Each child has the opportunity to develop their individual interests and strengths. Academics, social and emotional development, music and fine and gross motor activities, all form an integrated part of the day. Joy, quiet time and seriousness are combined. Children love singing together, playing percussion instruments, and dancing or listening to a performance.

#### The Foundation Is Montessori

The Montessori approach is based on a profound respect for the child. Montessori education believes in the necessity to treat children with dignity, trust and patience.

### An Inspiring Environment

Each classroom opens on one side into a small garden that encourages children to engage all their senses. We believe learning should be experiential. This is facilitated by all the Montessori materials having its own place in the room where it can always be found when not in use. Children are introduced to the materials in an orderly sequence and logical progression to help them develop their capacity for clear thinking.

# Do we know what the world will be like, 20 years from now?

We see trends in business, social relationships and the environment that indicate a future that is fast changing. How do we prepare our children to meet the challenges of a global village while growing up within the challenges and limitations of our own villages?

We believe we can best help our children by helping them to grow into their potential through an environment that encourages their curiosity, that challenges their mind and their body through a mix of mental stimulation and physical activities, and that lays emphasis on group work and individual attention.

We believe we can best prepare children for a fast-changing future by helping them to become independent, self-reliant, flexible, responsible and open-minded.
